

### Standard Features:

**NEW!** Auxillary Outputs!      **NEW!** Stylish Transmitters!      **NEW!** Programmable Features!  
**NEW!** Domelight Supervision!      **NEW!** Starter Interrupt!

The REC-12 is a fully-featured and easily expandible keyless entry system with lock, two unlocks (for driver's door priority), trunk and 3rd channel outputs. This unit has flashing parking light and dome light relays built-in, and remote panic feature. Included is Omega's standard 5 pin main harness, secondary flashing light and base doorlock output harnesses. The REC-12 also includes a Blue Status Indicator Light, and plug-in Valet Switch. 39 programmable options offer great flexibility and customization. Not included with this model, but within its capabilities, is multi-car operation.

**Two Transmitters included:** New design OEM-style 4-Button Transmitters with pictograph buttons.

**Operations: Lock Button-** Press and release to Lock doors. Press and hold to activate Remote Panic with locking doors (horn connection required).

**Unlock Button -** Press and release to Unlock doors. If driver door priority is configured, one press unlocks driver's door, second press unlocks all. Press and hold to activate Remote Panic with unlocking doors (horn connection required).

**Trunk Button -** Press and hold to activate trunk release.

**III Button -** Press and hold to activate the 3<sup>rd</sup> channel output.

**How to Code the Transmitters:** Turn "on" the ignition, then press the valet switch 5 times and wait for audible response (via horn honk). Press and release the Lock button on each transmitter to be coded (one at a time). The system will respond to each with an audible confirmation.

Omega part # 4410-07

\*OPTIONAL #4410-07B is Available For Multi-car functionality

**MORE Programmable Features Options!** The Omega REC-12 is extremely versatile, due to a comprehensive array of 12 programmable features, with many of the individual Features offering as many as four setting choices.

### Programmable Features

**How to program:** Turn the ignition ON, then OFF. Press the Valet Swtch 5 times (the horn will honk; the Status LED lights **Blue**). Then select the desired feature by pressing the Valet Switch the same number of times as the feature number. After the system honks the horn the same number back, choose the feature's setting by pressing the transmitter buttons: the **Lock** button (L); **Unlock** button (U); **Trunk** button (2) or **III** button (3).

Feature Programming:	Ignition on, off, press valet 5 times (Horn honks, status light turns on)			Bold = Default setting
